

Water Conditioning

SoftH₂O-FLO

Stylish, compact, ready to install units with integral flow meter that saves money on salt and water. Ideal for light commercial use as well as excelling in residential installations, the FLO system boasts excellent features at a competitive price.

Using the SPECTRUM 5 control valve FLO systems boast advanced features. Each FLO system comes equipped with everything required to immediately begin producing soft water, including resin.

Compact 5 litre FLO system

NEW

New to the SoftH₂O-FLO range is the compact WTS-SOFT5 which incorporates the same high quality SPECTRUM 5 valve.

The simple and compact design means the system can be easily plumbed in under sink for convenience.

Compact, easy to use and ready to install water softening systems with integral flow meter

42°C

PED 97/23/EC

Key system features

- PED compliant pressure vessels for reliability and peace of mind
- High grade resin included with each system
- ¾" BSPM inlet / outlet
- Ready to install with integral vessel, resin, brine tank and brine valve system
- Minimal regenerations means less wastewater to drain during regeneration process

Key valve features

- LCD display shows time of day and number of days before next regeneration
- Volumetric control precisely measures the volume of soft water produced to optimise salt usage
- Chronometric option available (WTE-SOFT)
- Battery option available (-B after product code)
- Integrated bypass allows usage of hard water when soft water is not required i.e. when using a hosepipe
- Blending valve allows complete control over hardness
- Visual alarm indicated when salt refill is done
