

FLOW CONTROL series OP

For the accurate restriction of wastewater flows

PRODUCT DESCRIPTION

OP series, is suitable for restricting large flows of wastewater. By varying the effective outlet size of the control the flow can be adjusted. A pulling cable or pin can be used to insert and/or remove the plate from the control. The flow control is made of stainless steel AISI 304 and suited with a spigot at the back side that will be designed to fit a nominal pipe system.

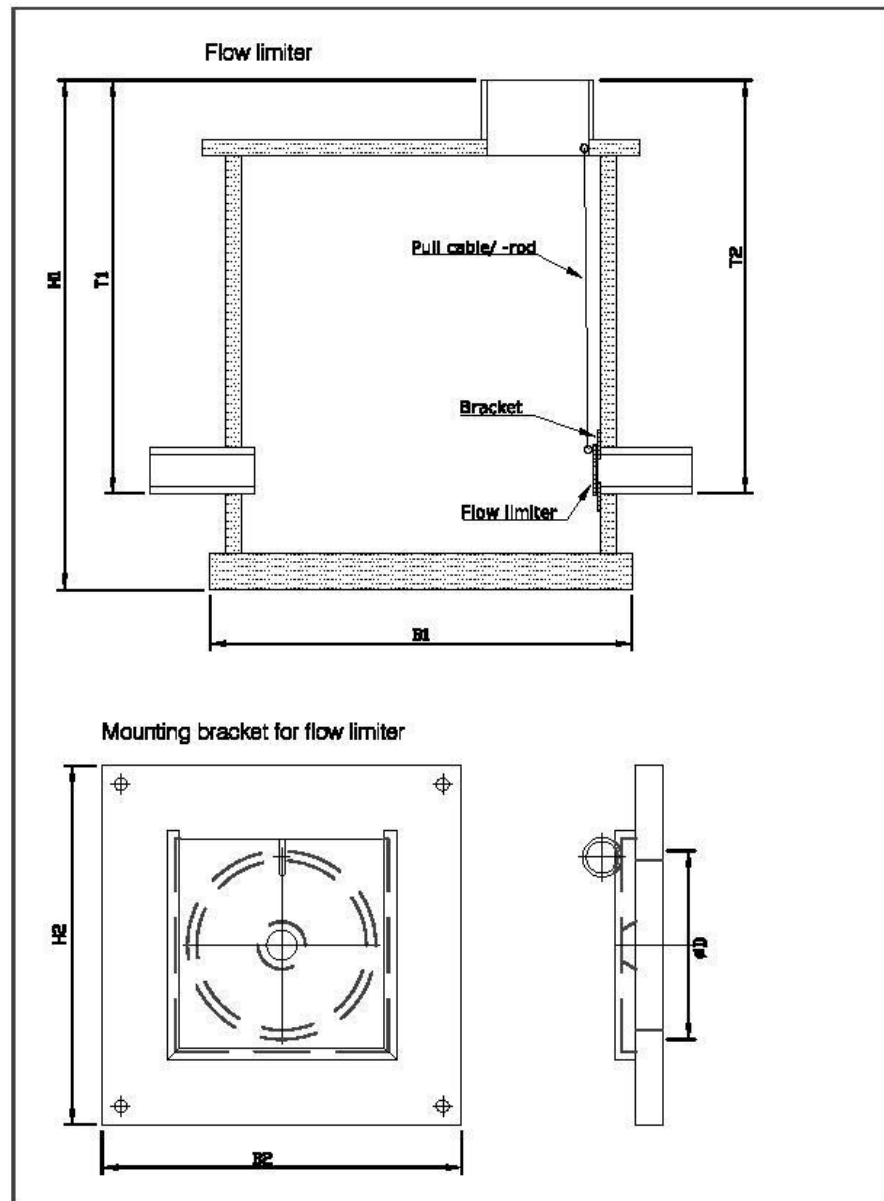

APPLICATIONS

The flow control is suitable for restriction of larger wastewater flows at industrial applications, before oil separators, or open sewer channels.

QUALITY

- No moving parts
- Durable design
- Stainless steel housing
- Removable
- Easy to install
